https://vasantak.github.io/vasanta_portfolio/
Bangalore, India

CORE TECHNICAL SKILLS

Frontend
React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, AngularJS, Vue.js, React Native.

State Management
Redux Toolkit, Redux, Context API, Zustand, React Query (TanStack Query) .

Backend & API Development
Node.js, Express.js, REST API Design, Middleware, JWT Authentication, Refresh Tokens, Async/Await, Promises, Error Handling

API Integration
Axios, Interceptors, REST API Consumption, Authentication Handling

Architecture
Component-Based Architecture, Custom Hooks, Feature-Based Folder Structure, Reusable Components

Performance
Lazy Loading, Code Splitting, React.memo, useMemo, useCallback, Memory Leak Prevention, Optimization.

Tools & Process
Git, GitHub Actions, CI/CD, Agile, Scrum

EDUCATION

BE — Electronics & Communication Engineering
Angadi Institute of Technology and Management, VTU, Belagavi
Graduated 2014

KEY STRENGTHS

9+ years full stack & frontend engineering
Frontend architecture leadership
Node.js/Express.js API development
Multi-framework versatility
Mentoring & code reviews
Agile/Scrum delivery

VASANTA B K

Senior Full Stack Developer | React.js Specialist | Node.js & Express.js

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9 years of experience architecting and delivering scalable web and mobile applications end-to-end. Deep expertise in React.js, TypeScript, and modern JavaScript (ES6+), paired with hands-on Node.js and Express.js backend development for REST API design, integration, and secure authentication. Skilled in state management using Redux Toolkit, Context API, Zustand, and React Query, Angular and Vue.js. Proven record integrating 30+ REST APIs, optimizing application performance, and mentoring junior developers within Agile/Scrum teams delivering enterprise-grade software.

CORE COMPETENCIES

Full Stack Development (React.js + Node.js/Express.js) REST API Design & Integration • Authentication & Authorization (JWT) • Scalable Component Architecture • State Management • Performance Optimization • Agile/Scrum Delivery • Mentoring & Code Reviews

PROFESSIONAL EXPERIENCE

Senior Software Developer | Facile Consulting Pvt Ltd — Bangalore
April 2016 – Present

- Architected scalable, reusable React.js component architecture using TypeScript, improving maintainability across multiple enterprise projects.
- Directed client-side state management strategy using Redux Toolkit, strengthening application scalability and long-term maintainability.
- Implemented React Query (TanStack Query) for server-state management, including caching, query invalidation, background refetching, and optimistic updates.
- Integrated 30+ REST APIs using Axios with centralized interceptors, authentication handling, retry strategies, and global error management.
- Designed and implemented secure authentication and authorization flows using JWT and refresh-token mechanisms, including protected routes.
- Optimized application performance through lazy loading, code splitting, memoization, and render optimization.
- Collaborated with backend, QA, and product teams in Agile/Scrum environments to plan sprints and deliver high-quality releases.
- Mentored 2–3 junior developers through code reviews, technical guidance, and best-practice coaching.

SELECTED PROJECTS

Start Hub Application • *March 2025 – Present*
React.js, TypeScript, Node.js, Express.js, Tailwind CSS, REST APIs, PostgreSQL

- Architected and extended reusable React components with TypeScript for a scalable enterprise application, building frontend UI alongside supporting Node.js/Express.js backend services.
- Enforced React Query for efficient server-state management, background synchronization, and cache optimization.

- Built secure authentication with JWT, protected routes, and session management.
- Integrated multiple REST APIs using Axios and centralized interceptors.
- Applied optimistic UI updates to improve responsiveness during CRUD operations.
- Enhanced application performance using lazy loading, memoization, and code splitting.

Hello Spoke • *February 2024 – December 2025*

React.js, Node.js, Express.js, Tailwind CSS, REST APIs, MongoDB

- Developed and maintained a **property management communication platform** featuring call activity tracking, property dashboards, on-call scheduling, team management, and property settings.
- Built **reusable React components and custom hooks** for interactive dashboards, call logs, scheduling workflows, and property-specific configurations.
- Integrated **REST APIs using Axios** to retrieve call records, reporting metrics, user information, and property configuration data.
- Implemented **data-driven dashboards** with interactive charts, call analytics, searchable records, and **infinite scrolling** using Elasticsearch-backed queries.
- Worked on **Node.js and Express.js backend services** to support application workflows, API integration, and property-related functionality.
- Improved **application maintainability** by addressing duplicated business logic and supporting consistent behavior across dashboard, scheduling, and call activity modules.

CYA – Cover Your Asset • *January 2018 – June 2024*

React Native, Node.js, JavaScript, HTML, REST APIs

- Built a mobile-first asset management application for real-time equipment tracking and inventory management across Android and iOS.
- Implemented barcode and QR code scanning for fast, accurate asset identification.
- Integrated geolocation services to capture and monitor asset locations during field operations.
- Consumed REST APIs for asset synchronization, user management, and reporting.
- Improved application performance and responsiveness across mobile platforms.

Mentorz • *July 2023 – December 2024*

React.js, Tailwind CSS, REST APIs

- Built a mentorship platform connecting mentors and mentees through an intuitive, responsive web application.
- Developed reusable React components for session scheduling, mentor discovery, user profiles, and collaboration features.
- Implemented responsive UI with Tailwind CSS for a consistent cross-device experience.
- Integrated REST APIs for authentication, profile management, and mentorship workflows.
- Participated in code reviews and Agile development processes to maintain code quality.

ACHIEVEMENTS

- Integrated 30+ REST APIs across enterprise web and mobile applications.
- Mentored junior developers and improved onboarding practices.
- Contributed to CI/CD workflows using GitHub Actions.
- Improved application performance and maintainability through modern React best practices.
